CFR230: Investigative Techniques

Professor Pollock

February 28, 2023

Evidence Name	Evidence Number	Evidence Description
Haley Duff's Instagram account	1	Contains information including pictures of the victim, pictures of the suspect, and direct messages between the two.
Upton O'Good's Instagram account	2	Contains information including pictures of the victim, pictures of the suspect, and direct messages between the two. Furthermore, it was created only a few days before contact between the suspect and victim began.
messages.json	3	Evidence contains first known contact between suspect (Upton O'Good) and victim (Haley Duff). It appears Upton O'Good took advantage of Haley Duff's emotional vulnerability to begin contact. Timestamps indicate that first contact was on 2019-10-12 at 3:55:36. Messages continue throughout the month (October) and into the next (November), contains messages in which Upton O'Good and Haley Duff make plans to meet in person

media.json	4	Evidence contains contact between Haley Duff and Upton O'Goude. Messages within the file indicate familiarity between the two. Timestamps indicate these messages occurred less than a day after the previous messages found in "messages.json", on 2019-11-05 at 09:24:17.
comments.json	5	Evidence contains contact between users "@haleyduff00" (Haley Duff) and "@uptonogoude" (Upton O'Goude). Timestamps indicate the messages occurred on 2019-10-19 at 17:46:09. Notably, comments from before the contact indicate Hilary Duff showing signs of mental health issues.
profile.json	6	Evidence contains information about the account "@uptonogoude" presumably run by the suspect. Timestamps indicate the profile was created on 2019-10-08 at 10:18:59, approximately four days before first contact between the suspect and the victim was made.

Sticky Note (Seen in "2019-11-001-E.jpg")	7	Evidence contains the username and password for the account "@Haleyduff00" presumably controlled by the victim Haley Duff.
Gun (Seen in "2019-11-05-001-A.jpg")	8	The possible murder weapon used to kill Hilary Duff. A round is missing. There is no blowback on the gun. The serial number is partially removed.
500 GB Seagate External USB Drive (Seen in "2019-11-05-001-G2.jpg")	9	Found in the same room as the victim, it was examined and found to be wiped. Upon submitting the drive for latent prints, it was found to have the prints of the victim, Haley Duff, and the suspect, Upton O'Goude.
Locked iPhone	10	Currently, cannot be accessed, but may contain information including timestamps of when the victim was last active. There is also a possibility of finding fingerprints, which could help identify the suspect further.

Upton O'Goude laptop user files	11	Currently, cannot be accessed, but may contain information regarding whether the suspect has performed suspicious activity in the past or created and deleted accounts similar to the one which was used to contact the victim. However, the laptop may not have been properly handled, and thus may not be admissible in court.
